

ISO 21500 “Guidance on Project Management” is the first worldwide recognized standard on Project Management.

Helmut Berger was Head of the Austrian Delegation at the ISO committee and has already attended organizations in Austria implementing this new standard.

Being No. 1 in developing simulation games means being the first to create new ideas:

ISO Puzzle

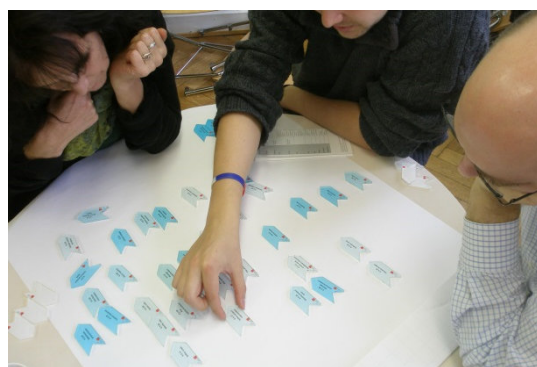

Reading management standards does not mean thrill, excitement and fascination. For this reason the cs-i ISO Puzzle has been developed: To make project management processes tangible and to support a playful approach to ISO 21500 "Guidance on Project Management". The challenge is to select and sequence the processes needed for a new project in a quick, efficient and team-oriented way. There is no better tool for project managers and project team members, project management office staff, project management trainers, -coaches and -consulting experts. ISO 21500 "Guidance on Project Management" shows what to do to achieve good project results.

ISO Puzzle shows in which way to act.

Every piece of the puzzle represents a single project management process, by numbers and colors it's position in the standards text is indicated.

ISO Puzzle consists of 39 Project Management Processes, 6 blank puzzle pieces and the manual, all together in a solid casket.

ISO Puzzle helps you saving time and money: meetings will end earlier up to 1 hour, depending on the number of team members.

Only Euro 105,- / USD 150,- excl. VAT and shipping costs

ISO Puzzle is based on ISO 21500 “Guidance on Project Management”
It is not a stand-alone tool, it should be used together with the standard.
